Why Choose CeramiGlass?

Excellent Performance	Excellent material choice for decorative applications, i.e. dot and line patterns on glass. Outstanding “green” strength prior to full cure. Compatible with typical tempering processes in automotive and appliance glass manufacturing. Stable in high and prolonged temperatures.
Environmental	100% water based, inorganic, Zero VOC’s.
Energy Savings	Potentially lower energy costs; can achieve full cure at lower temperatures.
Color	Standard color choices are Black, White, Green, Dark Green, Brown, Dark Brown, Red, Blue, Dark Blue, Light Blue, and Yellow. Additional custom color options may be available on request – please contact ICD for information.
Versatility	Coating may be used on all glass substrates. Can be used for interior as well as exterior applications. Flexibility in processing - coating may be applied to glass, stored, fabricated, and tempered.
Price Competitive	Economically competitive with other products like ceramic enamel.
Samples	Standard samples within 72 hours. For custom color requests, please contact ICD.
Service	Typical next day service for established programs. New order lead times are dependent on order specifications - please contact ICD. Knowledgeable and competent field and technical support.
Equipment	Screen printing application. Ease of clean-up – water based.
Credentials	Excellent reputation with over 30 years of successful service.
